tracking tigers in ranthambhore pdf

The tiger (*Panthera tigris*) is the largest species among the Felidae and classified in the genus *Panthera*. It is most recognizable for its dark vertical stripes on reddish-orange fur with a lighter underside. It is an apex predator, primarily preying on ungulates such as deer and bovids. It is territorial and generally a solitary but social predator, requiring large contiguous areas of habitat ...

Tiger - Wikipedia

Taxonomy. The Bengal is the traditional type locality for the binomen *Panthera tigris*, to which the British taxonomist Reginald Innes Pocock subordinated the Bengal tiger in 1929 under the trinomen *Panthera tigris tigris*. The validity of several tiger subspecies in continental Asia was questioned in 1999. Morphologically, tigers from different regions vary little, and gene flow between ...

Bengal tiger - Wikipedia

Parentes vivos mais próximos do tigre são o leão, leopardo e a onça-pintada, todos os quais são classificados sob o gênero *Panthera*. O mais velho parente extinto do tigre, chamado *Panthera zdanskyi*, foi encontrado na província de Gansu, noroeste da China. Esta espécie é considerada como um táxon irmão do tigre atual e viveu cerca de 2 milhões de anos atrás, no início do Pleistoceno.
