RED LIGHT CAMERA - WIKIPEDIA

ANALYTIC METHODS IN ACCIDENT RESEARCH: METHODOLOGICAL

traffic highway engineering garber pdf

A red light camera (short for red light running camera [citation needed]) is a type of traffic enforcement camera that captures an image of a vehicle which has entered an intersection in spite of the traffic signal indicating red (during the red phase). By automatically photographing vehicles that run red lights, the photo is evidence that assists authorities in their enforcement of traffic laws.

Red light camera - Wikipedia

The analysis of highway-crash data has long been used as a basis for influencing highway and vehicle designs, as well as directing and implementing a wide variety of regulatory policies aimed at improving safety.

Analytic methods in accident research: Methodological

There is no standard definition, but in the United States (where the terminology was devised in the 1970s from the engineering term light railway), light rail operates primarily along exclusive rights-of-way and uses either individual tramcars or multiple units coupled to form a train that is lower capacity and lower speed than a long heavy-rail passenger train or metro system.
