Biological roles. Isoprene emission appears to be a mechanism that trees use to combat abiotic stresses. In particular, isoprene has been shown to protect against moderate heat stress (around 40 °C).

The economics of global warming concerns the economic aspects of global warming; this can inform policies that governments might consider in response. A number of factors make this a difficult problem from both economic and political perspectives: it is a long-term, intergenerational problem; benefits and costs are distributed unequally both within and across countries; and scientific and ...

Preface: The following papers support skeptic arguments against Anthropogenic Climate Change (ACC), Anthropogenic Global Warming (AGW) or Alarmism [e.g. Catastrophic Anthropogenic Global Warming (CAGW) or Dangerous Anthropogenic Global Warming (DAGW)]. Please read the following introductory notes for more detailed information.
